

PolyMesh

PolyMesh fabric offers unlimited opportunities for standard or unique imaging requirements.

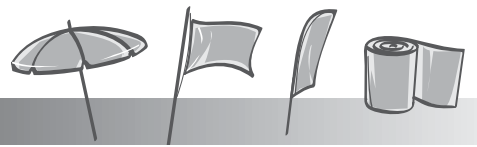

PolyMesh is an ideal 'LOOK' enhancement for any event, sponsorship or brand-building promotion.

The ground-breaking structure of PolyMesh allows maximum exposure with minimum wind impact.

Installing PolyMesh is quick and simple.

Reuse PolyMesh again and again.

Technical specifications

Description

PolyMesh is extremely lightweight; weighing only 112 gr/m², 3 times less than vinyl.

PolyMesh comes in 2 m / 6 ft 6 inch widths. Join sections together for larger sizes.

PolyMesh fabric is able to spill twice the wind of traditional media through distinctive fabric vents.

Powerful 4 Colour Process Prints can be printed in lengths up to 20 ft. We can print up to 12 Spot Colours.

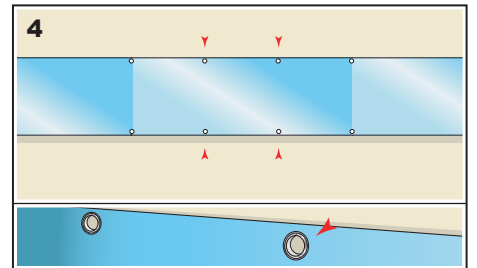

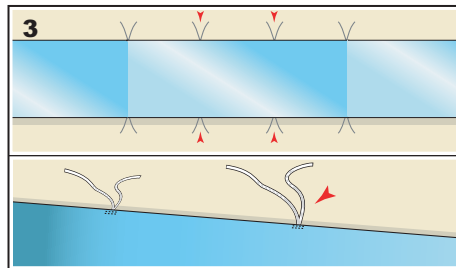

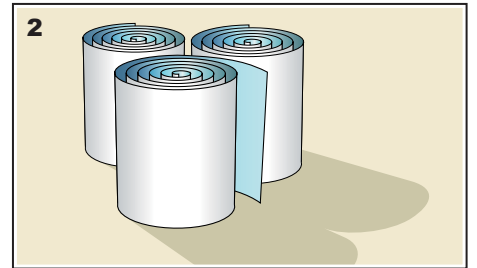

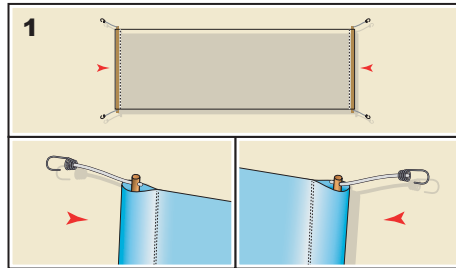

PolyMesh offers 100% through-print which means the image on the back is as strong as the front.

Proper care & maintenance will provide the chance to reuse PolyMesh repeatedly.

Finishing Options

1. Sleeves on the left and right side with wooden dowels and bungees.
2. On the roll.
3. With strings to tie.
4. With grommets.

Applications

Use PolyMesh for Event & Sponsorship fencing; whether a short or long-term promotion.

Cut and Finish PolyMesh into individual banners with special sewing.

Builders and Developers use PolyMesh to create attractive Construction Sites with brand reinforcing images.

PolyMesh is excellent from Retail Events including Grand Openings and Summer Garden Centres.

PolyMesh can be used for any of our flags, banners or free-standing banner systems.
